Updated list of databases

As you know, the [geneXplain platform](#) is integrated with a big number of regularly updated databases. In the current release for the first time ever you will find all of our commercial databases fully integrated into the platform: versions 2018.2 of [TRANSFAC](#), [TRANSPATH](#) and [HumanPSD](#) databases are waiting for you online!

Moreover, the release 4.9 of the geneXplain platform presents you the updated Ensembl 91 and Reactome 63 databases.

TRANSFAC

TRANSPATH

HumanPSD

✓ FANTOM5

✓ ENSEMBL

✓ UNIPROT

✓ miRProm

✓ mirDB

✓ GeneOntology

As always, you will find a more detailed release and product description at our [homepage](#). We will appreciate any [feedback](#) from you and we are always open for your [questions](#).

With kindest regards

The geneXplain Team
