Genome Enhancer release 2.4

New features

The 2.4 release of Genome Enhancer comes with the following new features:

Databases update: TRANSFAC[®], TRANSPATH[®] and HumanPSD[™] databases used in the Genome Enhancer analysis were updated to the release 2021.2.

Demo reports update: all demo reports of Genome Enhancer pipeline were updated to the analysis results provided by Genome Enhancer release 2.4. The demo reports can be freely accessed with a demo account at <https://ge.genexplain.com> or at [Genome Enhancer product page](#) on our web site.

Genome Enhancer Expert

Starting from release 2.0 Genome Enhancer offers to its users a powerful synergism between the automatic pipeline for multi-omics data processing of Genome Enhancer and the comprehensive bioinformatics toolbox of the geneXplain[®] platform.

You can contact us via info@genexplain.com to find out how to upgrade your current geneXplain license to the [Genome Enhancer Expert solution](#).
