## Genome Enhancer release 3.4

### Database updates

TRANSFAC<sup>®</sup>, TRANSPATH<sup>®</sup> and HumanPSD<sup>™</sup> databases used in the Genome Enhancer analysis were updated to the release 2024.1.

Please note that with the new release the analysis results might vary from the previous ones.

### Updated demo reports

All demo reports of Genome Enhancer pipeline were updated to the analysis results provided by Genome Enhancer release 3.4. All demo reports can be freely accessed at [Genome Enhancer product page](#) of our web site.

## Genome Enhancer Expert

Starting from release 2.0 Genome Enhancer offers to its users a powerful synergism between the automatic pipeline for multi-omics data processing of Genome Enhancer and the comprehensive bioinformatics toolbox of the geneXplain<sup>®</sup> platform.

Contact us via [inquiries@genexplain.com](mailto:inquiries@genexplain.com) to find out how to upgrade your current geneXplain license to the Genome Enhancer Expert solution which is introduced in the [Full package of the TRANSFAC database](#).
