Genome Enhancer release 3.6

Database updates

TRANSFAC$^{®}$, TRANSPATH$^{®}$ and HumanPSD™ databases used in the Genome Enhancer analysis were updated to the release 2025.1.

Please note that with the new release the analysis results might vary from the previous ones.

Updated demo reports

All demo reports of Genome Enhancer pipeline were updated to the analysis results provided by Genome Enhancer release 3.6. All demo reports can be freely accessed upon login to the Genome Enhancer tool.

Genome Enhancer Expert

Starting from release 2.0 Genome Enhancer offers to its users a powerful synergism between the automatic pipeline for multi-omics data processing of Genome Enhancer and the comprehensive bioinformatics toolbox of the geneXplain$^{®}$ platform.

Contact us via inquiries@genexplain.com to find out how to upgrade your current geneXplain license to the Genome Enhancer Expert solution which is introduced in the Full package of the TRANSFAC database.
